**12 unique Mobile App ideas**  
**that you could use to set off a**  
**rewarding business.**

*wegile*

**Connect, Share Stories  
With Fellow Pet Owners.  
Allow Your Pet To Meet  
More Furry Friends.**

**A social networking app designed for pet owners and animal lovers to connect, share stories, and find resources for their furry friends. This app allows users to find nearby pet-friendly venues, get advice from other pet owners, and even purchase pet supplies. Allowing stores and pet owner to create its own eco system, also a purrfect social media platform such as [Instagram](#).**

**App for Homeowners and Real Estate Agents: This mobile app would help homeowners manage their properties. The homeowner will be able to post photos, add notes, and keep track of home maintenance tasks. The real estate agent will be able to schedule showings, send messages, and schedule appointments with clients. This app idea to solve a problem can come in handy for realtors!**

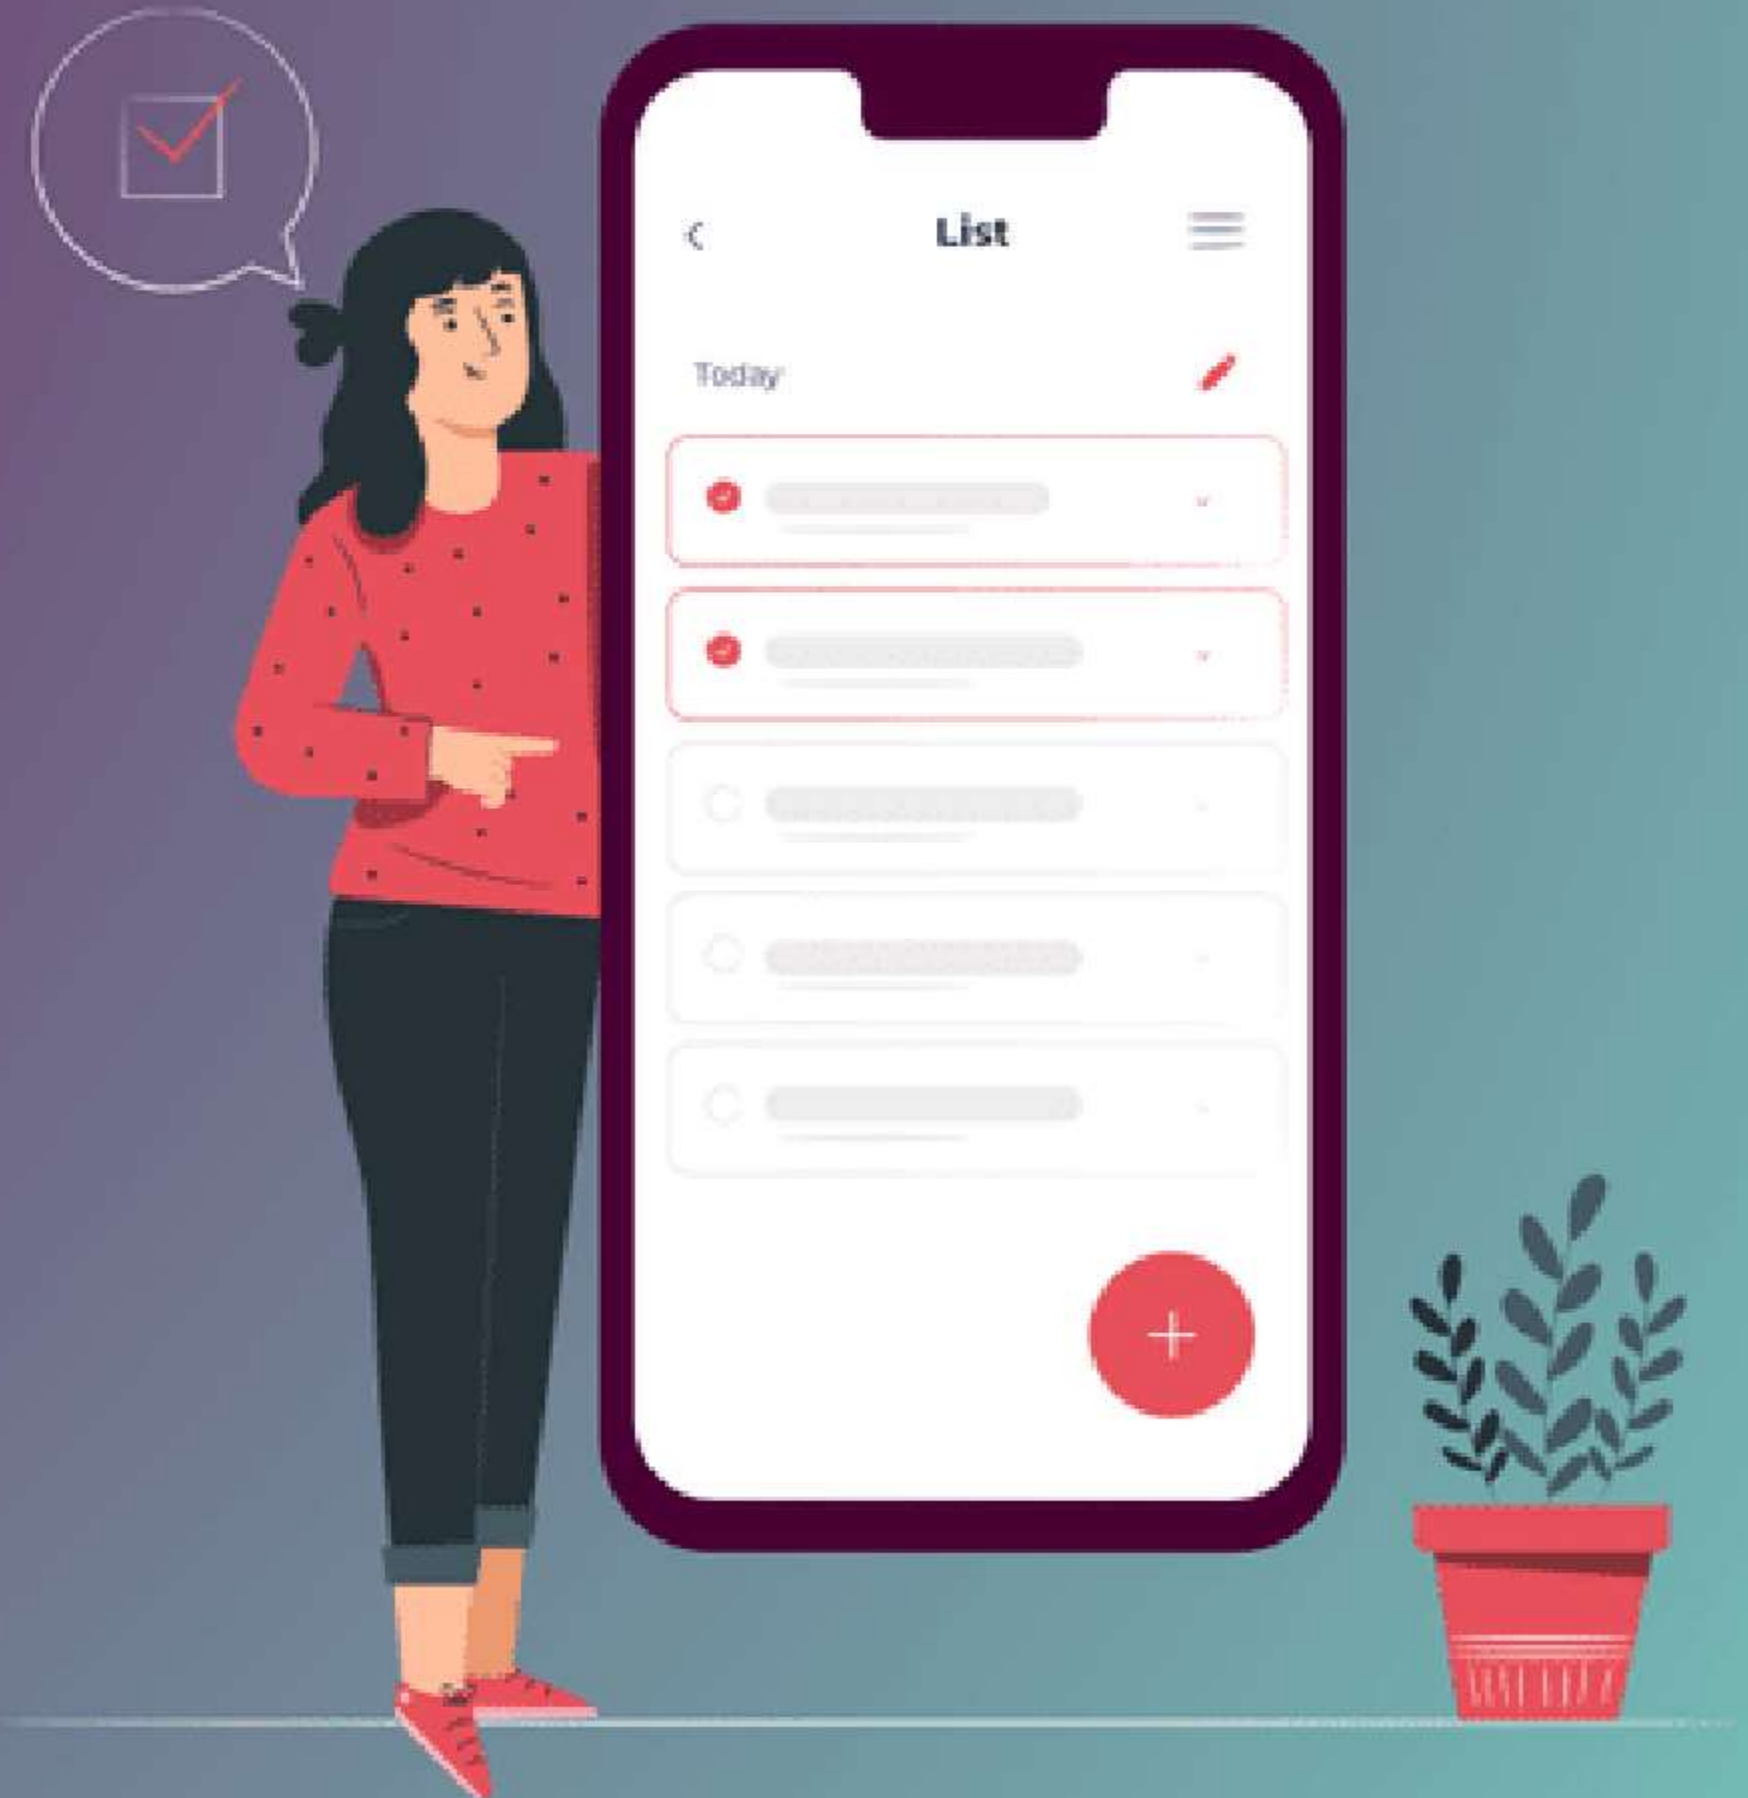

**App for Professional Organisers: This app would help professional organisers manage their clients. The organiser would be able to keep track of what services were provided, send reminders to clients, and receive feedback through surveys and reviews.**

**Keep Track of Your  
Auto Purchasing List  
And Organize Your  
Regular Shopping  
List. Let Your App  
Manage The Hassle!**

**App for Creators in which the creators and brands can get together and collab, making it easier for creators and sponsors to find each other and reach their preferred audience on various social media platforms!**

**Parking Finder App: Find the nearest available parking space by location or amenity, with real-time updates about the availability and prices of various spots around town.**

**Outdoor Adventure App that helps users find outdoor activities in their area and connect with other outdoors people to plan, track, and share their adventures.**

**Create The House  
of Your Dreams,  
Manage Your  
Household Bills,  
Organise Your  
House Well, And So  
Much More!**

**An App for Tracking and auto-purchasing your wishlist on various e-commerce websites such as [Amazon](#) or [Flipkart](#). The app, through the product page link, should add the product to a list, and the user will be able to set the price limit to auto-complete the transaction. A great tool to get the best deals for consumers!**

**A mobile app that allows you to shop smarter, this app would provide personalised shopping advice based on your budget and preferences, helping you make more informed decisions about buying items online. This would be one of the great app ideas to solve shoppers' current problems!**

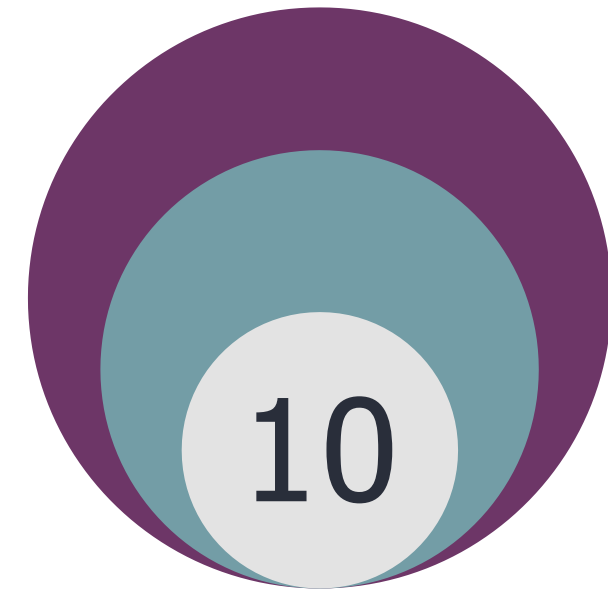

**A Virtual Reality Game: This app would be an immersive gaming experience, much like the movie Inception. It would allow you to create a virtual world, interact with others inside of it, and even create your own games. So an open-world virtual game enabled with cross-play enabled? You can even contact wegile to help you with [Cross Platform App Development](#) so that you can have a seamless experience so that you can implement app ideas to make money.**

- ★ **Brainstorm App Ideas.**
- ★ **Take Inspiration From Problems In Society To Develop Your App.**
- ★ **Be Creative.**
- ★ **Develop A Sound Business Strategy.**
- ★ **Create A Successful And Lucrative App.**

**An interior design app for iOS and Android devices that can help people create entire house designs from furniture stores, living rooms, master bedrooms and kitchens. Additionally, such apps could assist in managing household bills or organising information about the house itself. Furthermore, an app could be developed that allows users to compare furniture in different stores to find the best deal.**

**This trending app idea for beginners in photography could be a game-changer: First, an app that helps amateur photographers learn how to use manual settings on their cameras. Second, an app designed specifically for editing photos on mobile devices with powerful features like non-destructive editing and batch processing capabilities. Finally, a comprehensive photo library management tool that can store images from multiple sources and make it easy to find specific images quickly.**

**An app that allows people to find their way around unfamiliar places without relying on paper maps or a GPS system. Using [AR](#), the app could provide directions, point out landmarks and surrounding businesses, and even show where items such as public restrooms are located within the area. With this type of application, people would no longer have to worry about getting lost or asking strangers for help when they're out exploring new places. This would end all the language barriers and especially a dream for introverts, an app idea to solve problems.**
